Re: Notice of Regulatory Requirements
15A NCAC 2L .0106(b), (c), and (f)
Corrective Action

Maple Transfer Station Spill
216 Airport Road,
Maple, Currituck County, NC
Incident Number: 93138
Ranking: Unknown

Dear Ms. McQueen:

Information received by the UST Section, Washington Regional Office in the Email on March 9, 2012 and the UST -62 form on March 13, 2012 have been reviewed. Information in the reports confirms a release or discharge of petroleum product from an above ground used oil collection container at the above-referenced location. This office has determined that you are responsible for the release or discharge.

As a responsible party, you must comply with the initial response and abatement action and the assessment requirements of 15A NCNC 2L .0106(b), (c), and (f). An Initial Assessment Report prepared in accordance with these requirements and the most recent version of the *UST Section Guidelines for the Investigation and Remediation of Contamination from Non-UST Petroleum Releases* must be received by this office within 30 days of the date of this notice. Failure to comply in the manner and time specified, may result in the assessment of civil penalties and /or the use of other enforcement mechanisms.

Because a release or discharge has been confirmed, a Licensed Geologist or a Professional Engineer, certified by the State of North Carolina, is required to prepare and certify all reports submitted to the Department in accordance with Title 15A NCAC 2L .0103(e) and 2L .0111(b).

If you have any questions regarding the actions that must be taken or the rules mentioned in this letter, please contact me at the address or telephone number listed below.

Sincerely,

Bill Crew
Hydrogeologist
Washington Regional Office
